Denise told me they had a call today with ATSDR/Removal/ERT, and I'll join them for another call tomorrow to discuss the sampling plan. Removal and ERT are going down next week to do more subslab and indoor air sampling at the potential sources, the Head Start building, and other buildings within 100 ft of the potential sources.

Thanks,

Hi Denise,

I am cc'ing the risk assessor on the site, Becky, because I believe this review is meant for her. Please let me know if you would like me to review it as well.

Hi All,

My apologies, I had some minor rounding errors in the TCE
comparison values listed in Table 2 of this document. The
attached has corrected values. Nothing else is changed! Thanks,

Jill

Subject: ATSDR (draft) Letter Health Consultation for Cabo Rojo
NPL site - pls send comments by COB tomorrow, 2/3/12
Importance: High

Hi Denise,

Attached please find our draft letter health consultation (LHC)
for the Cabo Rojo GW contamination site. As we discussed,
this LHC provides a list of our recommendations on actions
needed to characterize potential exposures through vapor
intrusion, so that appropriate public health response can be
made.

Please note this draft is still undergoing internal review and
may change based on comments received from you and others.
Please do not share, cite or quote outside of agency at this
point.

Given the urgency, we ask that you send us your comments by
close of business tomorrow, Friday, Feb. 3rd, so that we can
expedite the clearance of this document through our system.
Please feel free to share this with others within EPA for
comment/review.

Thanks,
Elena
